FREE FACT SHEET · VA AT AI EP 1

Will AI Replace VA Jobs? The 2026 Facts

Short answer: the VA job is changing, not disappearing. Manual, repetitive tasks are what goes away.

Source	What it found	What it means for you
World Economic Forum Future of Jobs Report 2025	170M new jobs and 92M displaced by 2030, a net gain of 78M. Administrative assistants are among the fastest-declining roles.	Pure admin, copy-paste work is shrinking. Level up now.
ILO GenAI exposure index, May 2025	About 1 in 4 jobs worldwide is exposed to generative AI. Clerical work is the most exposed. Transformation is more likely than replacement.	Tasks get automated, not whole jobs. A person still checks and decides.
Upwork In-Demand Skills 2026, Feb 2026	Demand for top AI skills more than doubled (+109%). General virtual assistance is still a top skill in admin and support. Ecommerce management +130%, medical VA +44%.	Clients still hire VAs, and they prefer VAs who use AI well.
IBPAP Philippine IT-BPM outlook, 2026	The 2028 targets were lowered because of faster AI adoption, with the focus now on AI-enabled workers.	The jobs are still here, but AI-enabled workers get picked first.

AI can now do (fast)	Clients still need a VA for
First drafts of emails and captions	Understanding the client and their business
Meeting and email summaries	Checking and correcting AI output
Formatting and cleaning data	Talking to customers and the team
Simple research and lists	Setting up and maintaining tools and automations
Answers to repeated FAQs	Responsibility: a real person who owns the result

30-DAY ACTION PLAN · VA AT AI EP 1

Your 30-day AI action plan

Small daily steps. Use AI on real work, and always check the output.

Week 1: pick one tool

☐ Choose one AI assistant (ChatGPT, Claude or Gemini) and use it every day
☐ Draft 5 emails with it, then edit them yourself
☐ Ask your client which AI tools are allowed with their data

Week 2: use it on real tasks

☐ Summarise a long email thread or meeting notes
☐ Clean a messy list with formulas and AI help
☐ Save your best prompts in a doc

Week 3: build a system

☐ Write one SOP for a task you repeat every week
☐ Automate one small task (form to sheet, auto-reply)
☐ Note how much time you saved

Week 4: show it

☐ Make a before and after sample for your portfolio
☐ Update your profile with results, not just tool names
☐ Watch Ep 2 to 4 of VA at AI sa Tagalog
