# GoHighLevel Troubleshooting Checklist

Go top to bottom before you message support. Most problems are one missed setting.

### Emails go to spam or don't send

☐ Dedicated sending domain added in Settings › Email Services
☐ SPF, DKIM and DMARC records verified (GHL Ep 4)
☐ From name and email match the domain
☐ Contact is not unsubscribed or marked DND
☐ No spammy words, too many links or big images

### Texts (SMS) fail

☐ A2P 10DLC brand and campaign approved for US numbers (GHL Ep 5)
☐ Phone number assigned to the sub-account
☐ Contact has a valid number with country code
☐ Contact is not DND for SMS
☐ Message follows carrier rules (opt-out line)

### Workflow doesn't fire

☐ Workflow is Published, not Draft
☐ Trigger filters match the contact (tag, form, calendar)
☐ Allow re-entry if the contact was already enrolled
☐ Check Enrollment history and Execution logs (GHL Ep 26)
☐ Wait steps have a timeout

# Troubleshooting Checklist (continued)

### Calendar won't book

☐ Calendar is active and has availability
☐ Team member's availability and timezone are set
☐ Google or Outlook calendar connection is still valid
☐ Minimum scheduling notice is not too long
☐ Date range and slot interval are correct

### Form or funnel issues

☐ Form is saved and added to the published page
☐ Domain is connected and SSL is active (GHL Ep 3)
☐ Page step URLs and redirects are correct
☐ Test in an incognito window
☐ Workflow trigger uses the right form

**BEFORE YOU CONTACT SUPPORT**

- Write the exact steps to repeat the problem
- Add screenshots and the contact or workflow link
- Note the time it happened and the timezone
- Never share passwords or full API keys in a ticket
