FREE CHECKLIST · VA CHALLENGES EP 6

Payment Holds and Fees

Compare what actually reaches your bank in pesos, not just the fee on the page.

Step	Where money can be lost
1. Client pays in USD	Late payment, wrong amount
2. Platform	Service fee, if you use a platform
3. Wallet (PayPal, Wise, Payoneer)	Fees and the exchange rate
4. Bank or e-wallet	Withdrawal fees and timing
5. You	Compare the final PHP amount

Avoid payment holds

- ☐ Verify your account before you start work
- ☐ Same name on your ID, wallet and bank
- ☐ Clear invoices
- ☐ Never let anyone else use your account
- ☐ Expect extra checks on new accounts or sudden large amounts

Fees and rates change. Always read each provider's official fee page (for example PayPal Philippines Merchant Fees) and check the "last updated" date.

TRACKER · VA CHALLENGES EP 6

Payment tracker

Track every payment and fee. It helps with budgeting and tax.

Date	Client	USD billed	Fees	PHP received	Method

Overpayment scam

☐ A client pays too much and asks for a refund of the difference
☐ Do not refund until the original payment fully clears and is verified
☐ If in doubt, it is usually a scam
