FREE PLANNER · VA AT AI EP 7

AI Chatbot Planner for VAs

Collect the right info from the client first. A bot is only as good as its knowledge base.

Client questionnaire

☐ The 20 most common questions customers ask, with the correct answers
☐ Prices, opening hours, location, booking link
☐ Policies: refunds, cancellations, payment methods
☐ Topics the bot must never answer (medical, legal, complaints)
☐ Who takes over when a human is needed, and how fast

Bot flow step	What happens
1. Message	A lead messages on the website, Facebook or SMS
2. AI answer	The bot answers from the FAQ and knowledge base only
3. Details	Collects name, phone and preferred day, saves to the CRM
4. Booking	Books on the calendar and sends a confirmation
5. Handoff	Passes complaints, refunds and emergencies to a person

In GoHighLevel this is Conversation AI (guided form, prompt-based or flow builder setup). Similar tools exist, such as ManyChat for Facebook and Instagram.

Bot prompt and test checklist

Copy, change the details, then test before you launch.

BOT PROMPT TEMPLATE

You are the friendly assistant for [Business], a [type of business] in [City]. Your goal is to answer questions and book appointments. Only use the information in the knowledge base. Never invent prices, and never give medical, legal or financial advice. Keep replies short and warm. If you are not sure, or the customer is upset, say a team member will reply soon and hand the chat to a human.

Test before launch

☐ Ask the 20 common questions and check every answer
☐ Ask something the bot should not know: does it hand off?
☐ Try a complaint and a refund request
☐ Check the booking and CRM fields are saved correctly
☐ Test on mobile

Weekly maintenance (sell this as a monthly retainer)

☐ Read the bot conversations
☐ Fix wrong answers and add new FAQs
☐ Report leads and bookings that came from the bot
