AI Video Editing VA: Short-Form Clips

One long video becomes many short clips. Clients have the videos but not the time.

Step	What you do
1. Input	Get the long video: podcast, webinar or Zoom recording
2. Pick	Find the best 30 to 60 seconds (an AI clip finder can suggest, you decide)
3. Captions	Add auto captions, then check every line
4. Hook and CTA	Strong first 3 seconds, clear call to action at the end
5. Deliver	Export 9:16, name files clearly, schedule or send

Size	Use it for
9:16	Reels, TikTok, YouTube Shorts
1:1	Square feed posts
16:9	Long YouTube videos
Safe zone	Keep text away from the edges and bottom

Caption check

☐ Names, brands and numbers spelled right
☐ Short lines, easy to read on a phone
☐ No text hidden behind app buttons

RULES AND OFFERS · VA AT AI EP 8

Do it right, then package it

Tools to explore: CapCut (auto captions), Descript (edit video like a document), AI clip finders such as OpusClip.

Rules

☐ Use licensed or royalty-free music only
☐ Never copy a real person's voice or face with AI without written permission
☐ Keep files in the client's folder with a clear naming system
☐ Check captions before every export

Build a portfolio with no clients yet

☐ Use your own videos, or a friend's with permission
☐ Make 3 clips in different styles
☐ Show the before and after
☐ Put them in Google Drive or your Upwork portfolio

SAMPLE PACKAGE

Weekly Clips: I turn 1 podcast or webinar episode into 10 captioned short clips (9:16) with hooks and CTAs, ready for Reels, TikTok and Shorts. Delivered every Friday.
